Re: Annual Notification – Asbestos Management Plan

The Asbestos Hazard Emergency Response Act (AHERA), passed in 1987, requires all public and private schools to inventor and inspect all building for asbestos containing materials. This inspection was completed at Montrose School in 1988, and has been updated (reinspected) every third year (last reinspection was conducted on June 20, 2015). Any areas of known or assumed friable or nonfriable asbestos will continue to be inspected on a regular basis (every six months) and procedures implemented to assure no health hazards are present.

Our management plan has been filed with the State Department of Health and in on file in the school office. The plan is available for public inspection during normal office hours. Copies of the management plan will be provided to requesting parties for the cote of reproduction. For further information please contact Mr. Johnson, the school's asbestos program manager at 605-363-5025.

Reinspections will be conducted every third year so long as asbestos in known or assumed to be in the school (this will be completed in June of 2018).

Sincerely,

Mr. Johnson
Superintendent
